## Hazelwood PC Secure Data Storage

### **Why off-site backup is a requirement for your business**

Chances are your business is very dependent on the files stored on your computer. The question must be asked; if those files disappeared today, would your business suffer?

---

### **Features:**

**Protect your data from Ransomware, computer hard drive failure, theft, fire, and natural disasters such as lightning or tornado**

**Peace of mind knowing that your data is secured using today's standard 256bit (3DES, AES, TwoFish) encryption protection.**

**HIPAA Compliant**

**Highly customizable interface allows for backups to be scheduled to run when your computers are not busy**

**Real Time Backup synchronizes your files to the cloud at the moment when they are saved**

**Configurable retention allows you to go back in time to recover deleted files**
